

MY627W

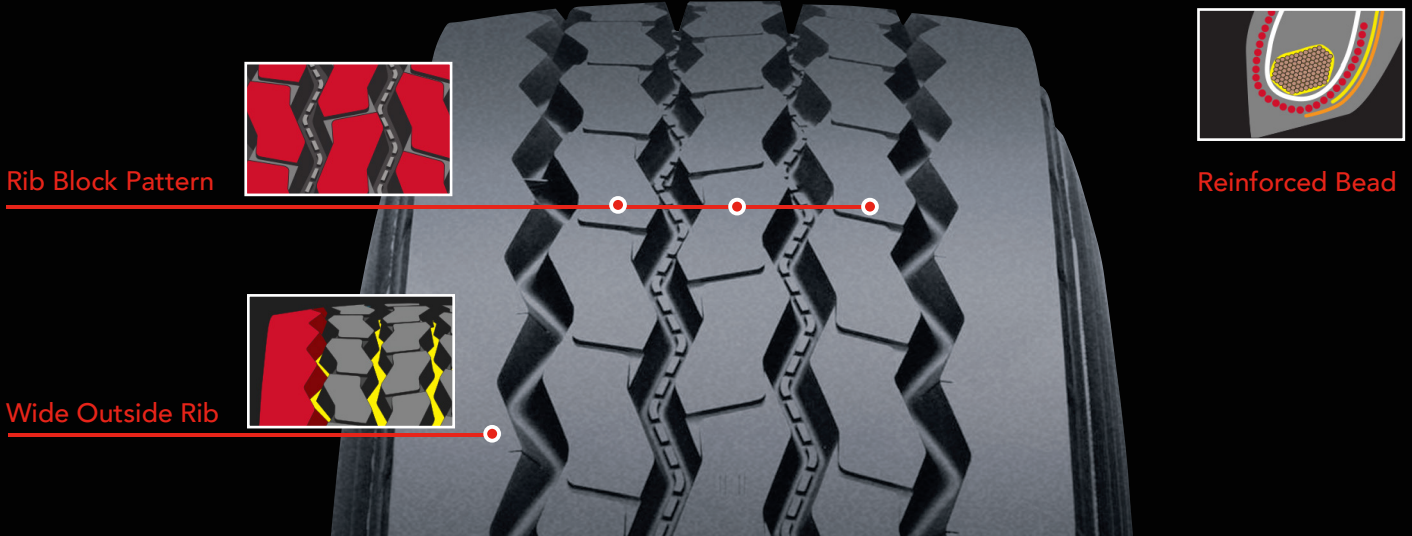

REENGINEERED TOUGHER TO LAST LONGER.

MY627W

WASTE/SANITATION
VEHICLES

ALL-POSITION

With its extra-rugged casing and specially engineered compound, the MY627W Spec-2 is one of the most dependable all-position tires available for waste/sanitation vehicles. Made to defy the rigors of daily use, designed to run cooler and reengineered with an ultra-thick undertread and wider cap base, the MY627W Spec-2 is one seriously heavy-duty tire.

LONGEVITY

Rib-block tread pattern features specialized block alignment to resist uneven wear and provide additional biting edges in inclement weather and on loose gravel surfaces.

EFFICIENCY

The highly **reinforced bead** is protected by a double nylon chafer which insulates it from the heat generated by frequent stop-and-go operations. The chafer also provides extra protection during mounting and dismounting.

Our **durable inner liner** is not only critical to air retention, it also enhances retreadability by preventing air from migrating to the casing walls.

DEPENDABILITY

Built for the daily grind, the new **ultra-tough casing** runs cooler and lasts longer than ever before, and is designed to handle **multiple retreads**.

A **wide outside rib** resists tears and increases durability, while the **extra wide serpentine grooves** effectively expel water, significantly improving traction in wet weather conditions.
